**Ecomindmap**

Supporting  
services

• dispersal  
• persal  
• production

# Ecosystem

Name of  
ecosystem

System conditions

- Climate
- Geology
- Geomorphology

Substances

- processes related to dissolved components

Structures

- morphological features
- substrate

Hydrology

- hydrological processes
- hydraulic processes

Species

- taxonomic entities
- biotic communities
- biotic processes

Maintenance

- control measures

regulating  
services

- carbon sequestration
- climate regulation
- purification of water
- ...

provisioning  
services

- food
- water
- mineral
- energy
- ...

• ...
